

Exciting News for Table Tennis Enthusiasts in Katy, Texas

Houston International Table Tennis Academy, HITTA, has been in the Katy area since 2016 serving customers of all ages and all playing levels coming from the greater Houston area as well as many Latin and South America countries. We have achieved great deal of successes including growing many junior National Team players and helping many youngsters find a life long love for a healthy sports in table tennis.

As HITTA has seen rapid increase in student intake and high growth in our competition teams segment since after the COVID pandemic, we are quickly outgrowing our current 12,000 sq ft facility. Our current facility also greatly limits us from hosting some of the highest level domestic and international tournaments.

To support our growth and bring better, more exciting training opportunities for our students, HITTA is excited to announce our brand new 28,000 sq ft state of the art facility just minutes from our current location in Katy.

With this expansion, HITTA will offer our customers the following;

- A world class facility suitable for 4-stars domestic and international tournaments with an audience capacity of more than 200.
- Upwards of 40+ tables for training.
- Extensive after school academic and enrichment programs that run concurrent with our table tennis programs.
- Very conducive environment for parents to work and students to study.

Figure 2 Rendition of HITTA's new facility. Not final.

This will simply be the largest full time table tennis facility in the United States that will serve the table tennis training and after school academic and enrichment needs of our customers for many years to come.

We expect our new facility to be ready by the start of 2025 Summer break.

To celebrate this milestone for HITTA, we will be rolling out a series of **HITTA New Chapter Promotions**.

We hope you will join us in this exciting new chapter of HITTA!

More updates and promotions coming from now till our grand opening. Keep an eye out for these!
